Home Phone Tunes

10260 SW Greenburg Road

Suite 1200

Portland, OR 97223

Tel: 503-459-4775

Email: s.rankin@homephonetunes.com

Web Site: <http://www.homephonetunes.com>

Home Phone Tunes was incorporated in 2005 after inventing the HPT Player and technology (patents pending). This small consumer electronic device resides between the home phone and the phone jack on a wall or broadband connection. The HPT Player enables residential phone subscribers to download customizable ringtones for their home. Subscribers manage their ringtones via a portal that allows them to select ringtones and assign them to a specific phone number or Calling Line ID (CLID) or family of identifiers (i.e. telemarketers, unknown caller, private name, private number, etc). Digital content is encrypted and transferred from the content library to the subscriber's HPT Player via a USB port on a computer linked to a broadband connection. The digital content resides within the HPT Player and the residential subscriber defines the frequency at which they wish to update, change and personalize their ringtones.
